

BASIC ELECTRICITY TRAINER

Delta Electronic

Basic Electricity Trainer dari Delta Electronic adalah sistem praktikum kelistrikan dasar dalam kemasan hardcase portable dengan modul lengkap untuk pembelajaran listrik DC, AC, dan elektromagnetik.

SPESIFIKASI UTAMA

Power Supply [DE-PTE-022-01]

Supply voltage : Max. 230 VAC, 1 phase 50 Hz
Output : DC +5 V / 1 A; +15 V / 1 A; GND; -15 V / 1 A
Output connections: 4 mm sockets

Variable Power Supply [DE-PTE-022-02]

Supply voltage: Max. 230 VAC
Output: 0 - 20 V DC
Voltage steps: 0–20 V (step 2V)
Current: 1 A
Output connections: 4 mm sockets

Three Phase Transformer [DE-PTE-022-03]

Input voltage: Max. 3x (0-230) VAC L-N
Output voltage: 0 - 9 V AC
Current: 300 mA
Connections: 4 mm sockets

Container Box I [DE-PTE-022-04]

Switch, Resistor, LDR, Capacitor, Diode, Zener, Lamp, Potentiometer

Container Box II [DE-PTE-022-05]

Battery, Adapter, Coil, Core, PTC, NTC, Magnet

Basic Meter [DE-KAL 4]

Voltage & Current measurement (DC)

Assembly Board [DE-GSE 110]

Modular experiment board with socket grid

KEUNGGULAN DELTA ELECTRONIC

- Desain hardcase aluminium premium industrial
- Panel front aluminium presisi tinggi
- Sistem modular interkoneksi aman (banana jack 4mm)
- Internal power supply terintegrasi
- Layout profesional untuk praktikum modern
- Durabilitas tinggi & tahan benturan
